

Last year IsoTek chose the London High-End Hi-Fi Show to launch the Titan, this year the Titan was awarded **‘Best Accessory’**. This is no mean feat as this is a heavily contested category which not only covers power conditioners but also Hi-Fi Racks, including all forms of equipment support, CD mats, LP cleaners, in fact any product which falls out of the ‘general’ Hi-Fi component categories.

Hi-Fi News commented, *“This mains filter singly redefined what is possible for cleaning mains quality, particularly for power amplifiers which traditionally have not been suited to this kind of treatment. Peerless looks and build add to a package that can fundamentally improve a system’s sound.”*

Always setting new standards
